Abstract (en)

A lock is provided which can be inserted into a desk or other item of furniture in order to lock drawers or doors thereof, and the lock is removable from the furniture, removal of the lock being controlled by use of a key. The lock comprises first engagement means (30) for selectively engaging with a supporting structure (2) to secure the lock to the supporting structure, and second engagement means (16) for selectively controlling either directly or indirectly, the locking of an element for allowing access to a protected region, whereby motion of the first engagement means (30) and motion of the second engagement means (16) is controlled by at least one key. <IMAGE>
