Abstract (en)
[origin: EP1103936A2] The emergency call device (1) is linked to the automobile audio device (2), with its loudspeaker (3) used for transmitting an acoustic emergency call signal to the automobile passenger compartment in an emergency situation, via a controlled switch (5), connecting the loudspeaker to the emergency call device. The control input (6) of the switch can be connected to the current supply (7) of the audio device, which is disconnected in an emergency call situation.
