Abstract (en)
[origin: WO0078468A1] The invention relates to a roller provided for use in coating machines. The inventive roller is provided for directly or indirectly applying a liquid or pasty medium to one or both sides of a running web of material, especially made of paper or paperboard, and comprises a core (15) whose outer casing is provided with a covering (3a) made of an elastomeric material. According to the invention, the covering (3a) is designed such that it can be compressed.
