Abstract (en)  
[origin: GB2340425A] A power press (10, Fig. 1) has a lower press tool 12. A shaped die 20 is set at the required height using a spacer assembly 22. The spacer assembly is formed by interengaged spacer plates 23, 24 between support plates 21a, 21b. The spacer plates may be identical and are formed by laser cutting from sheet steel. This system reduces the time and effort required to form a spacer to suit a particular press job.
