Abstract (en)
[origin: WO0011162A1] A novel p15 BID polypeptide having cell death agonist activity is disclosed. The p15 BID polypeptide is produced by caspase-cleavage of BID in cells undergoing cell death mediated by TNF or FAS receptors. The p15 BID is useful in methods for modulating death of a target cell which comprise treating the cell with p15 BID. Methods for inhibiting cell death are also described which involve treating a target cell with a mutant p15 BID lacking cell death agonist activity.
