Abstract (en)

[origin: EP1104922A2] The arrangement has an input unit for entering commands by the user and a transmission unit for transmitting the entered commands to the car radio. The input unit has a microphone (10) for picking up spoken commands and a speech recognition unit that can classify signal sequences from the spoken commands picked up by the microphone from a defined command set. Independent claims are also included for the following: a method of remote control of a car radio.
