Abstract (en)
[origin: WO0009119A1] A method for treatment of mammals suffering diseases responsive to inhibition of beta -amyloid peptide (A beta) production, comprising administering to the mammal an amount of a compound of general formula (I) or a pharmaceutically acceptable salt hydrate or solvate thereof sufficient to inhibit A beta production wherein R1, R2, R3 are as defined in the specification and R4 is an ester or thioester group.
