Abstract (en)
[origin: WO0009415A2] A pack for an epoxy adhesive and a hardener comprises two compartments (4, 6) disposed on opposite sides of a labyrinth member (14). Squeezing the compartments (4, 6) forces both the epoxy adhesive and hardener through a tortuous passageway defined by the labyrinth member (14). The epoxy adhesive and hardener mix while travelling along the passageway and exit the nozzle (20) as a mixed adhesive product.
