Abstract (en)
[origin: DE19836940A1] An opening(25) which is closed off by a flap(24) is formed in the lower region of the box section(11) or in the region of the bottom(17). The opening as well as the flap extends by one section inside the box rear wall(14) and by another section inside the bottom. The flap, which in cross section is angular in form, is hinged on the rear wall by one side(26) and by the other side(27) in the region of the bottom. The flap is defined by a weakened line or stamped line(33) inside the blank produced for the packet.
