Abstract (en)

[origin: WO011275A1] An outflow which can be installed in flat supporting elements (3), especially in a sub-structural tub for a shower basin, comprising a lower part (2) that is joined to the waste-water drain below the supporting element (3) and an upper part (1) that can be joined thereto above the supporting element (3), whereby the upper part (1) of the outflow has an insertable grid cover and at least one sealable, closeable opening (15) is provided inside said grid cover, creating a passage leading to the lower side of the supporting element (3).
