Abstract (en)

[origin: FR2782552A1] The hydraulic feed assembly consists of a tank (21) with return and feed ports (22, 23), a filter (81), a pump (41) and an expansion chamber (31), and has its main components enclosed in a housing (61). The housing is substantially impermeable and is lined with a layer of a thermal insulation material (64) which is not intrinsically impermeable. There is a gap (67) between the insulation layer and the tank (21) and a condensation collector (68) underneath it.
