Abstract (en)
[origin: DE19836693A1] The plug-in connector has co-operating plug and socket halves, for coupling an electrical cable with signal and current supply lines to an electrical load, by corresponding pairs of contacts contained in a waterproof casing. The casing is divided internally by partition walls (7,8) into at least three relatively sealed chambers, each containing at least one current supply contact (2-5) or at least one signal contact (6).
