Abstract (en)

[origin: WO0011821A1] A maximum accumulation allowed is defined (302) for messages associated with at least one of a source of the messages and a recipient of the messages. A processing system (210) determines (306) a current accumulation of the messages associated with the at least one of the source and the recipient. The processing system stops (312) further accumulation when the current accumulation reaches the maximum accumulation allowed.
