Abstract (en)

[origin: EP1106370A1] Printing method in which a first band and mark are printed on the print medium, the medium is advanced and an algebraic distance determined between theoretical and actual printed marker positions. Accordingly for each droplet of a salvo a voltage correction is applied to compensate for the print medium position. For the drops of the following row an additional compensating voltage is again applied. An Independent claim is made for an inkjet printer in which corrections can be made for print medium position.
