Abstract (en)
[origin: EP1106520A1] The present invention is for a pallet box for packaging and transportation of goods in a box positioned and fastened on to a load pallet. Each of the connected sides (5, 6, 7, 8) of the box is joined to a fastening flap (11, 12, 13, 14) which is nailed, stapled or otherwise fastened to the top of the load pallet. An all around folding line (9) is positioned a short distance up from the bottom of the box and two opposing sides have folding lines which start from the intersections of the all around folding line (9) and the folding lines (26, 27, 28, 29) between the sides of the box and extend themselves obliquely upwards to the upper edge of each side. The oblique folding lines are at the two long ones (5, 7) of the four sides. The pallet box may comprise side wall inserts (2) which together may cover the whole of the inside of the box. <IMAGE>
