Abstract (en)
[origin: EP1106550A1] The transporting device includes a holding unit (20a, 20b, 20c, 20d) which can be turned about an axis perpendicular to the circumferential track by means of a control device selectively during the transportation from the receiving point to the issuing point (A1, A2), leaving it in a turned position or turning it to a set angle for further processing.
