Abstract (en)

[origin: EP1106760A1] The long bolt fastening has at least one actuator (3) extending above and/or below a control housing, located behind an end section (4) and having its free end projecting beyond the end section and a guide (12) mounted on it in the locked position. The tip of the end section is shaped to overlap the end of the actuator (3) in the unlocked position for fitting the guide, which is in the form of a sleeve (11) with a lug for clipping it onto the end section.
