Abstract (en)
Plastic-insulated tie-in points (2) are designed to fit into grid and have slot- or groove-like extensions in wire guide slots that restrict zone of contact. Electric connecting unit (1) has these tie-in points with zone of insulation-displacement contact. Rib-like projections (14) are arranged at distance to contact as seen in direction of longitudinal axis of extension. Slot or groove like extension has two further opposing rib-like projections which border open edged take-up slot for wire.

Abstract (de)
Anschlussstellen elektrischer Geräte oder Baugruppenelemente die insbesondere zum automatischen Verdrahten eingerichtet sind, sind in ein Rastermaß passend mit schlitzoder nutartigen Verlängerungen (16) der die Kontaktierzone begrenzenden Leitungsführschlitze (15) ausgebildet
