Abstract (en)

[origin: WO0012412A1] The present invention provides (with reference to the Figure) a mousse diffuser (11) for attachment to an aerosol container having an outlet valve. The mousse diffuser (11) comprises a body (12) having a valve button (13) hinged thereto which is moveable to operate the outlet valve. The valve button (13) has a chamber (18) into which the contents of the aerosol are discharged, the chamber (18) having an opening (21) through which said contents are dispensed. The opening (21) is covered by a grill (22) which is hinged to the valve button (13) and securable in place over the opening (21). The present invention also provides a method of manufacturing the mousse diffuser (11).
