Abstract (en)
[origin: WO0011133A1] A composition for treating fabrics, comprising: a) a fabric shrinkage reducing composition selected from the group consisting of ethylene glycol, all isomers of propanediol, butanediol, pentanediol, hexanediol and mixtures thereof; b) a liquid cleaning/refreshment composition. The fabric shrinkage reducing composition and the liquid cleaning/refreshment composition are releasably absorbed in a substrate in a weight ratio of from about 1:2 to about 1:5. The fabric shrinkage reducing composition helps to reduce shrinkage of the fabrics treated in an in-home, non-immersion cleaning and refreshing process which is conducted in a clothes dryer, or the like apparatus. Also provided are non-immersion cleaning/refreshment processes using this composition, a kit containing the necessary items to conduct the processes of this invention and a sheet for releasably absorbing the compositions of this invention.
