Abstract (en)

[origin: WO0014217A2] The present invention relates to a composition comprising an oligonucleotide comprising (a) the sequence N1-N2-G-N3-G, wherein N1 represents any nucleotide if N2 and N3 are G; N2 represents any nucleotide if N1 and N3 are G; and N3 represents any nucleotide if N1 and N2 are G, or (b) the sequence of (a), wherein at least one nucleotide is replaced by a corresponding nucleotide analog or derivative. The present invention further relates to the use of the composition, and/or the oligonucleotide of the present invention for the production of a pharmaceutical composition for preventing or treating septic shock, inflammation, autoimmune diseases, TH1-mediated diseases, bacterial infections, parasitic infections, viral infections, spontaneous abortions, and/or tumors.
