Abstract (en)
[origin: WO0012751A1] A method for visually demonstrating the effectiveness of an anti-bacteria attachment composition which comprises: a. treating skin with potential or known anti-bacteria attachment composition; b. contacting the said skin with a bacteria, resulting in the skin having bacteria attached to it; c. contacting the skin with a bacteria growth supporting medium having optionally therein or later optionally added a compound or mixture thereof which will assist in visually detecting a bacterial colony.
