Abstract (en)
[origin: WO0014445A1] A connection assembly (1, 53, 60) for coupling to a pipe (18). The assembly includes a body portion (2), a collar portion (6), an 'O'-ring (4) and a grip ring (5). The body and collar portions are arranged for bayonet type connection which serves to force the grip ring into engagement with the pipe and simultaneously energise the 'O'-ring to form a seal between the body portion and the pipe. A locking means (50) is preferably provided to prevent relative rotation between the collar portion and body portion.
