Abstract (en)

[origin: EP1108666A2] The device for removing banknotes from a transport belt (20, 22) comprises comb components (50, 54). These are positioned where the belt changes direction and move the notes on in the direction in which the belt was originally moving. Independent claims are included for: (a) a device for feeding banknotes to a storing device containing the above device; and (b) the transport belt.
