Abstract (en)

[origin: EP1108669A2] The winding system for a paper slitter-rewinder can simultaneously wind several reels in different positions. A winding bar (11) is provided for each reel (9). The bar can be moved away from it and its height above reel support rollers (2, 3) can be varied. A feeder (22) fits cores (10) on the winding bar and removes completed reels from it.
