Abstract (en)
[origin: EP1108808A1] The device has an optical sensor arrangement with a transmitter and a receiver mounted on a transparent solid tube section. The sensor is mounted in a fitting (3) with a transparent measurement tube section (4) beneath the outflow aperture (1) in the washing solution container and near the outflow line and the fitting is designed to be inserted into a suitable opening in the outflow line (9). Independent claims are also included for the following: a drum washing machine, a dishwasher and a washing machine.
