Abstract (en)
[origin: EP1108840A2] The adjustable fixture is for a glass pane (5) to an adjacent component (3). A holding piece (6) is firmly adhered to the exterior of the glass panel and a tab (2) of the fixture (1) penetrates the holding piece where it is fixable frontally. The holding piece has a horizontally running breakthrough (7), in which the tab penetrates with considerable clearance. The holding piece is C-shaped. A vertical wall locating on the glass pane has a horizontally formed upper cross wall and a horizontally formed lower cross wall. The walls have front tabs angled inwardly. In the vertical wall on the outside a horizontal groove is formed.
