Abstract (en)
[origin: EP1108843A2] A method for fitting hinges to glass doors uses a grip block (10) applied to the glass with adhesive. The hinge flap (2) has a cut-out that fits loosely over the block and the fitting is secured by a clamping block (15) secured by threaded fasteners (8) screwed into the block. The fitting allows a set amount of fine adjustment after assembly, by loosening the fasteners. Countersunk screws provide a flush fitting.
