Abstract (en)

[origin: EP1109256A2] A plug connector is used for inserting the connecting element into the module conductor terminal. A clamp is conductively coupled to the plug connector, is spring actuated and secures the screened cable (6) to the connecting element. The plug connector is in the form of multi-plug connector (12a,b), plug-cable in two or more, adjacent or spaced conductor terminals of the module(s). The clamp is designed to secure several screened cables to the connecting element.
