Abstract (en)  
[origin: EP1109270A2] The present invention relates to a socket-outlet for lighting fixtures, the socket-outlet comprising a body (4, 6, 11) and a female connector (1) arranged to the body, the connector comprising conductor joints (2) for receiving electric wires and female coupling elements (3) for providing a contact between the conductor joints and the coupling elements of a male connector. To allow a more versatile socket-outlet than before to be provided, the female connector (1) in question is in the form of a part which is separate from the body and which is provided with fastening members (9) for fastening the female connector (1) to fastening members (10) arranged to the body. <IMAGE>
