Abstract (en)

Remote controller (FG) has connector (AE) connected with communication or data network (N). Controller has converter (UE) to convert received remote control signals (FS) into control signals (IS). Remote control signals are provided from end unit (EG) to network. End unit is e.g. a conventional telephone, with remote control signals input by key combination or by using DTMF transmitter. Remote control signal is two or multi-frequency tone, speech signals or data signals. Remote controller contains receiver unit (EE) for control signals (IS) to store control signals and remote control signals assigned to each other.

Abstract (de)

Die Erfindung betrifft ein Fernsteuergerät (FG) mit einer Sendeeinheit (SE) zur Abgabe von Steuersignalen (IS), insbesondere Infrarot-Steuersignalen, an fernbedienbare Geräte (FB), bei dem eine Anschlussseinheit (AE) zur Anbindung an ein Kommunikations- oder an ein Datennetz (N), und bei dem eine Umsetzeinrichtung (UE) zur Umsetzung von über die Anschlussseinheit (AE) empfangenen Fernbediensignalen (FS) in die Steuersignale (IS) vorgesehen sind. <IMAGE>
