Abstract (en)

[origin: WO0013497A1] The present invention relates to an animal stall defining an animal space (11) for one animal, comprising an entrance gate (14) openable and closable by means of a first driving means (18) associated with a control means, and an exit gate (16) openable and closable by means of a second driving means (28) associated with said control means. According to the invention, at least a part of the entrance gate (14) is adapted to be moved into an animal space (11) for goading the animal to leave the animal space via said exit gate (16).
