Abstract (en)

[origin: WO0012144A1] A composition capable of forming a coherent gel when contacted with an aqueous fluid, said composition comprising a water soluble polymer, said polymer, when dissolved in an aqueous fluid, forms a water insoluble gel, characterized in that said composition comprises a non-aqueous mixture of at least two water soluble polymers or a salt thereof, said polymers having opposite charges and forming, when dissolved in an aqueous fluid, a water-absorbing, water-insoluble, coherent gel.
