Abstract (en)

[origin: DE19839638A1] The invention relates to a system for enabling a moving person to control body movements to be performed by said person. Said system comprises a video camera (1) and a monitor (3) for the output of the recorded video image (4) as well as a means (5) for inserting at least a mark (6) indicating the position to reach during execution of a movement or a predetermined body position in the video image (4).
