Abstract (en)
[origin: WO0013918A1] The invention relates to a carousel-type paint toning machine comprising a frame (1); a carousel base (3) arranged rotatably in an upper part (2) of the frame; containers (4) for toning paste, arranged in a circle on the carousel base; means (5) for rotating the carousel base (3); means for mixing the paste in the paste containers, the means comprising a mixer (6) inside each paste container and a rotatable part (7) connected to the mixer and situated below each container; and means (8) for rotating the rotatable parts (7) connected to the mixers. In order to reduce the costs of manufacturing the machine, the carousel base (3) and the means (8) for rotating the rotatable parts (7) connected to the mixers (6) are formed by cutting them from a single plate, the middle of which forms the carousel base (3) and the remaining outer part forms the means (8) for rotating said rotatable parts.
