Abstract (en)
[origin: WO014720A1] The invention concerns a method for sound reproduction similar to that of musical instrument by using at least a soundboard excited by at least an acoustic transducer or vibration generator. Said method is illustrated by an electro-acoustic apparatus constituting the mechanical aspect of a musical instrument excited by at least an electro-acoustic transducer (6), providing the reproduction with sound authenticity, useful in all audio-visual fields and the world of sound in general.
