Abstract (en)
A hook screw driver includes a holding section including a first part and a second part that are releasably engaged together. At least one of the first part and the second part includes an inner side that has a compartment defined therein. A holding member is mounted in the compartment and made of a deformable, frictional material for securely holding a hook portion of a hook screw. One of the first part and the second part has a notch defined in an end thereof and communicated with the compartment. The notch is to be extended by a neck portion of the hook screw. <IMAGE>
