Abstract (en)

Tile pressing press comprising a pressing mold into which a charging device (14,114) dumps powder to be pressed. The charging device (14,114) comprises in turn a charging box (18,118) having a bottom (37,137) opening on command and running between a charging position outside the press and a position for dumping into the mold within the press. The box in its charging position is near means (15,16,17,115,116,117) of input therein of powder to be pressed and the box bottom in its dumping position is opened to dump the powder into the mold. In one embodiment the box bottom is made with a plurality of parallel plates (37) rotating on command between a smooth closed position and an inclined dumping position. In another embodiment the opening bottom is made with a running gate (137). <IMAGE>
