Abstract (en)
[origin: EP1110841A1] The slider bar (13) has one central (2) and two side sections (1), and when installed, the central section is located under the aligned side sections. All sections are connected via screwed connection parts (3) and insulation elements (5). The slide contact surface of the bar is coated with molybdenum in the area of the tongue attachment. All three sections are forged from micro-alloyed steel. An adjusting motor is located outside or in the center of the bar.
