Abstract (en)

[origin: EP1110904A1] Device for lateral movement of load taking means (25) at combi trucks with a cogbelt (10) extending horizontally over the entire width of the truck, which cogbelt has its cogs or teeth facing the truck or a driver cage on this. At the load taking means the cogbelt runs via two pulleys (19) in a lope out and around a cog wheel (20) journaled in the load taking means. By rotation of the cog wheel the cogbelt is drawn in around the cog wheel and out the other side moving the load taking means laterally. <IMAGE>
