Abstract (en)
[origin: EP1111160A2] The garage has a skeleton support structure with vertical supports, horizontal roof supports (11) and several track plates (12) forming the drive-on surface on the roof supports. The drive-on track plates are mounted on the roof supports with the interposition of a grooved profiled body (16) which runs in the longitudinal direction of the gap (21) between adjoining plates and underneath same. The roof support preferably has an I-profiled section and the grooved profiled body is mounted with its underneath on the top web of same. The profiled body can be made of elastic plastics.
