Abstract (en)

[origin: EP1111179A2] The opening casement fanlight (3) closes against a fixed frame (4) and both the fanlight and the frame have for locking and unlocking a drive bolt fitment (9) with drive bolt which moves from the closed to the open position and is driven by a drive means (6). The opening means (5) have a scissor opening fitment (12) coupled to the drive bolt to hold the window open. The drive means can have a lever (13) which transfers the movement of an operating element (7) guided on a fixed component to the drive bolt which is mounted on the casement.
