Abstract (en)
[origin: DE19961756C1] The exhaust gas feedback valve has a linearly displaced valve element, e.g. a valve plate (18), which is rotated about its axis, at least at the beginning of its movement, via the valve element operating mechanism, e.g. a spindle-and-nut operating mechanism (22,24).

Abstract (de)
Ein Abgasrückführventil weist ein translatorisch bewegbares Ventilelement, insbesondere einen Ventilteller (18) sowie einen Betätigungsmechanismus auf, der dem Ventilelement (18) zumindest zu Beginn des Öffnungsvorganges eine Drehbewegung um dessen Achse erteilt. <IMAGE>
