Abstract (en)
[origin: EP1111247A2] Hydraulic system has constant pump (3) for supplying pressurized hydraulic fluid to neutral circulation line (20), supplying diverse loads via respective control valves and at least one oil plug socket (18) for driving attachment. A further constant pump (4) is coupled to second neutral circulation line (40) which supplies oil plug socket via second control valve, both control valves (16,33) providing independent control of parallel oil paths.
