Abstract (en)  
[origin: FR2780393A1] Process for preparing a composition based on a rare earth sulfide containing at least one alkali metal element comprises heating a mixture of at least one rare earth compound with an alkali metal phosphate or borate in the presence of at least one gas selected from H<sub>2</sub>S or CS<sub>2</sub>. Independent claims are included for: (1) A rare earth sulfide containing at least one alkali metal element prepared by the above process; (2) A colored pigment containing the rare earth sulfide; and (3) Compositions for coloring materials such as plastics, paints, lacquers, glazes, rubber, ceramics, paper, inks, cosmetic products and laminates.
