Abstract (en)

[origin: WO0016324A1] Apparatus for writing and/or reading information, said apparatus comprising a frame (1) and a writing and/or reading element (3) and being arranged for cooperation with a cassette provided with an information medium. The cassette comprises a housing with a window and an associated closing element, via which window the writing and/or reading element can cooperate with the information medium. The apparatus comprises a slide (5) bearing-mounted in the frame for receiving the cassette. The slide is displaceable between a first position (P1) located at a distance from the writing and/or reading element and a second position (P2) located closer to the writing and/or reading element, and comprises a drive means (9) for cooperating with the cassette, a means (13) for opening the closing element of the cassette and a means (15) for retaining the cassette relative to the slide. The apparatus has a simple construction and is easy to operate.
