Abstract (en)

[origin: FR2783082A1] The invention concerns an over-moulded electric cable (10) comprising: a cable (10) of the type including a plurality of insulated conducting wires (12) inside an insulating sleeve (11); and an over-moulding material (15) coating the insulating sleeve (11) over at least part of its length. The invention is characterised in that a groove (13) is produced on the insulating sleeve (11) outer surface, said groove being adapted to receive the over-moulding material (15). The invention also concerns a method for making such an over-moulded cable.
