Abstract (en)

[origin: EP1112945A1] In a packet having an engagement portion for hanging on a display unit, the engagement portion has a slot (7a, 7b) for engagement by an elongate member which projects from the display unit. The slot (7a, 7b) has a transverse opening (10) for permitting the forced passage of the elongate member as a result of the application of a force to the packet (1) in a direction substantially transverse the elongate member. <IMAGE>
