Abstract (en)

[origin: EP1112954A1] The machine comprises a positioning post (2) for bobbins (3) leaving a bobbin winding machine (1). Each bobbin is picked up by a robot arm (4) or similar and delivered to a turntable (5), where they are removed and palletized by a gripper (6), a piecer (7) with needles or similar, and a labelling post (8). The operation of the various posts and equipment is controlled by information management.
