Abstract (en)
[origin: EP1113133A1] The automobile door lock has a locking catch (2), an internal operating lever (3), a child safety lever (4), selectively blocking the release of the locking catch by the internal operating lever and a manual operating device (5) for the child safety lever, acted on by a resetting spring. The operating device is depressed against the return spring for successive activation and release of the child safety device.
